Profile

Computer Science graduate who builds end-to-end LLM-powered applications. Delivered a production platform with an AI assistant for a client, from requirements to deployment, and built projects in RAG, AI document extraction, and computer vision. Focused on making AI reliable and grounded in real data.

Skills

AI & Machine Learning:
RAG, LLMs, OpenAI API, AI Agents, NLP, CNN (TensorFlow), scikit-learn

Programming & Data:
Python, JavaScript, SQL, PostgreSQL, pgvector, Pandas, Data Preprocessing, Feature Engineering, Model Evaluation

Software Engineering & Backend:
React, Next.js, Node.js, Express.js, Docker, Redis, REST APIs, JWT Authentication, Git, Socket.io, Stripe

Experience

06/2026 – Present

FR Valoni Sh.P.K. — Full-Stack Platform with AI Assistant , *Client Engagement*
- Delivered a bilingual (Albanian/English) production platform (Next.js, Node/Express, PostgreSQL, Docker) with a public site and a secured admin CMS.
- Built an OpenAI-powered assistant scoped to answer strictly from live company data, cutting manual handling of routine visitor questions.
- Automated project-portfolio photo watermarking and shipped a visitor-analytics dashboard for stakeholder reporting.

Projects

08/2026 – 10/2026

Invoice Extraction Agent , *Personal project*
- Building a full-stack invoice processing platform (React/TypeScript, Node/Express, PostgreSQL) that extracts structured data from PDFs/images via a vision-language model, guarded by a deterministic layer against hallucinated figures, with JWT role-based access and bilingual support.

06/2026 – 07/2026

Docs RAG Assistant — Retrieval-Augmented Generation , *Personal project*
- Built a documentation chatbot grounded strictly in ingested docs: chunked and embedded Markdown into PostgreSQL/pgvector, retrieved via cosine similarity, and generated cited, source-linked answers under a strict grounding prompt to eliminate hallucination.

05/2026 – 06/2026

Traffic Sign Detection — Full-Stack AI Platform , *Personal project*
- Trained a CNN on GTSRB and deployed real-time inference as a Flask/TensorFlow microservice.
- Architected the surrounding platform (React, Node/Express, CockroachDB/Postgres) with JWT role-based access, Stripe subscription gating, Redis rate limiting, Socket.io live alerts, and PDF/CSV/JSON reporting.

Education

10/2023 – 07/2026
Prishtina, Kosova

UBT COLLEGE, *Bachelor of Computer Science and Engineering*

Courses

Present — **Machine Learning A-Z: AI & Python,** *Machine Learning, NLP, deep learning, reinforcement learning*

Present — **LLM Engineering: Master AI, LLMs & Agents,** *RAG, QLoRA, and AI agents across 20+ models (Ed Donner)*

05/2025 – 06/2025 — **Data Management — Innovation Centre Kosovo,** *SPSS, spreadsheet analytics, Python data automation*

Languages

- Albanian - Native
- English - Fluent
